Glow Plug Tester

SELLING POINTS

For simple electrical tests on low volt DC systems.

Simply remove the common rail to the Glow Plug and attach the positive and negative leads to the battery.

Use the probe on the Glow Plug and the unit will go through a test procedure starting at 16A then 7A and give a reading of OK if the Glow Plugs are performing correctly.

The unit will display Open or Short if the Glow Plug is found to be faulty.
